HTML Form Elements Assignment

Instructions:

1. Create an HTML file named `form_assignment.html`.
2. Design a form for a **"Job Application"** that includes the following elements:
   - A form title and description.
   - A variety of input types for capturing user data.
   - Buttons for submission and resetting the form.
3. Use appropriate attributes to ensure proper validation, labels, and placeholders.

Form Requirements:

1. Basic Structure

- Include a title for the form (e.g., "Job Application Form").
- Use the `<form>` tag with the `action` and `method` attributes:
  - `action`: A placeholder URL like `/submit-job-application`.
  - `method`: `POST`.

2. Form Elements to Include

- **Text Input**:
  - Full Name
  - Email Address
- **Password Input**:
  - Create a password field
- **Telephone Input**:
  - Include a phone number field: `<input type="tel">`
- **Date Input**:
  - A field for selecting the applicant's date of birth: `<input type="date">`
- **Dropdown Menu**:
  - A dropdown for selecting the desired position (e.g., "Software Developer", "Designer", "Project Manager"): `<select>`.
- **Radio Buttons**:
  - Options for the applicant's availability (e.g., "Full-time", "Part-time").
- **Checkboxes**:
  - Skills checkboxes (e.g., "HTML", "CSS", "JavaScript", "Python").
- **File Upload**:
  - A file upload field for submitting a resume: `<input type="file">`.
- **Textarea**:
  - A textarea for additional comments or a cover letter.
- **Submit and Reset Buttons**:
  - A submit button to send the form data: `<button type="submit">`.
  - A reset button to clear the form: `<button type="reset">`.
